Experience

Web Developer

ELAnatomic.gr

2022 - Present

- Developed e-commerce application, which helped grow company web presence and brand awareness significantly.
- Guided the business to expand its brand in Skroutz and Bestprice. Which helped raise sales by 50%.
- Created caching solution using Redux to significantly minimize traffic to the database.

Software Projects

Hybrid Mobile Application - Workout Tracker

<https://github.com/Tryferos/Workout>

- Helped me and my circle track exercise progress and display long term advancements with charts.
- Connects with Google's Fit app to show and monitor further daily statistics to help maintain a record of daily efforts.
- Uses Android's Geolocator API to start a running exercise and assist by tracking and showing various information about the run.

Full-Stack Application - Basketball Management System

<https://github.com/Tryferos/CAD>

- Lead a team of 3 to create a full stack application using React, MySQL and Spring Boot.
- Integrated encryption for user authorization using OAuth2 and JWT to increase system safety.

LAMP Stack Web Application - TodoList

<https://github.com/Tryferos/LAMP>

- Collaborated with a web development company, in the context of a university assignment.
- Combined 3 micro-services in a docker compose environment to create a portable and easily deployable service.

Open Source NPM Packages Contribution

<https://github.com/Tryferos/Workout>

- Helped the community develop projects faster by developing and delivering some of the most used React Components.
- Integrated Keyboard Navigation, Recent Searches and Dark Mode to cover most user use cases and developer needs.
- Provided the flexibility to disable, enable or edit every feature available to make it adjustable to every requirement.
